

Single Feasible Source Purchase

Title: AFIS System Database Expansion and Matcher

Description: The Missouri State Highway Patrol requires a database expansion and matcher to upgrade and enhance its Automated Fingerprint Identification System (AFIS). The Missouri State Highway Patrol AFIS system must be expanded to accommodate the increasing growth of records. The AFIS system hardware and software system is proprietary, and expansions and additional matcher can only be provided by MorphoTrak. Accordingly, due to the significant financial investment in hardware, software, and training invested in the MorphoTrak system, and the continued growth of the millions of fingerprint records, the required database expansion and matcher is required from MorphoTrak.

Contract Period: July 1, 2013 through June 30, 2014
